RR	REMOVAL ACTION REQUIRED-USED FOR NON-AWP SITES
SHFAR	SCHOOL SITE PROPERTY, FURTHER ACTION REQUIRED
VCOMP	VOLUNTARY CLEANUP AGREEMENT COMPLETE
VCP	VOLUNTARY CLEANUP PROGRAM
VTERM	VOLUNTARY CLEANUP AGREEMENT TERMINATED

## Responses to Comment Set 2

- 2-1 The DTSC Northern California, Central Cleanup Operations Branch identifies many contaminated sites that may impact the project. DTSC recommends that where trench excavation occurs at these locations proper precautions be taken to protect the public and workers. The Draft EIR, Section D.6 (Environmental Contamination and Hazardous Materials) pages D.6-8 through D.6-10, includes Mitigation Measures EC-1a through EC-1c (regarding Reviewing Agency Records and Reviewing Exposed Soil or Groundwater), which require record research, visual inspection and possibly sampling and laboratory testing to complete a site characterization and determine the potential for contamination impacting the project work area. The site characterization required by these measures would include identification of proper protection for workers, health and safety plan, and a plan for handling, transport and disposal of contaminated soil. This work would be completed prior to construction and coordinated with DTSC.
